American Journal of Physiology:
Heart and Circulatory Physiology

No. 1. JULY 1995

CARDIAC PHYSIOLOGY

Morphometry and muscle gene expression in hypertrophied hearts from polyomavirus large T antigen transgenic mice
E. Holder, B. Mitmaker, L. Alpert, and L. Chalifour H86

Effects of adenosine in simulated ischemia and reperfusion in guinea pig ventricular myocytes
J. M. Cordeiro, G. R. Ferrier, and S. E. Howlett H121

Cytoskeleton modulates gating of voltage-dependent sodium channel in heart
A. I. Undrovinas, G. S. Shander, and J. C. Makielski H203

Modulation of cardiac Na^+-K^+ pump current: role of protein and nonprotein sulfhydryl redox status
P. S. Haddock, M. J. Shattock, and D. J. Hearse H297

Time- and voltage-dependent modulation of a Kv1.4 channel by a β-subunit (Kvβ3) cloned from ferret ventricle **(Rapid Communication)**
R. C. Castellino, M. J. Morales, H. C. Strauss, and R. L. Rasmusson H385

Timing of sympathetic innervation affects growth of myocardium in oculo
T. C. Love and D. C. Tucker H140

Mechanism of mechanical alternans in ischemia-reperfusion: role of deficient relaxation of the strong twitch
O. N. Nwasokwa H169

Depressed regional deformation near anterior papillary muscle
J. W. Holmes, Y. Takayama, I. LeGrice, and J. W. Covell H262

4-Hydroxynonenal, a novel indicator of lipid peroxidation for reperfusion injury of the myocardium
I. E. Blasig, T. Grune, K. Schönheit, E. Rohde, M. Jakstadt, R. F. Haseloff, and W. G. Siems H14

Preconditioning reduces infarct size but accelerates time to ventricular fibrillation in ischemic pig heart
M. Ovize, J.-F. Aupetit, G. Rioufol, J. Loufoua, X. André-Fouët, Y. Minaire, and G. Faucon H72

Cardiac responses to induced lactate oxidation: NMR analysis of metabolic equilibria
E. D. Lewandowski, L. A. Damico, L. T. White, and X. Yu H160

Effects of moderate repetitive ischemia on myocardial substrate utilization
A. J. Liedtke, B. Renstrom, T. A. Hacker, and S. H. Nellis H246

Enhanced postischemic myocardial recovery following exercise induction of HSP 72
M. Locke, R. M. Tanguay, R. E. Klabunde, and C. D. Ianuzzo H320

Cardiac staircase and NMR-determined intracellular sodium in beating rat hearts
C. S. Lotan, S. K. Miller, T. Simor, and G. A. Elgavish H332

Lack of a role of adenosine in activation of ischemically sensitive cardiac sympathetic afferents
H.-L. Pan and J. C. Longhurst H106

Circadian aspects of apparent correlation dimension in human heart rate dynamics
P. Van Leeuwen, H. Bettermann, U. An der Heiden, and H. C. Kümmell H130

Effect of acidosis on hydrogen peroxide injury to the isolated perfused rat heart
T. Evans, H. Jin, N. Elkins, and J. I. Shapiro H308

VASCULAR PHYSIOLOGY

ATP raises $[Ca^{2+}]_i$ via different P_2-receptor subtypes in freshly isolated and cultured aortic myocytes
P. Pacaud, R. Malam-Souley, G. Loirand, and C. Desgranges H30

GTP requirement for isoproterenol activation of calcium channels in vascular myocytes
Q.-Y. Shi and R. H. Cox H195

Cholesterol feeding enhances vasoconstrictor effects of products from rabbit polymorphonuclear leukocytes
J. L. Hart, C. G. Sobey, and O. L. Woodman H1

Dissociation of endothelial cell dysfunction and blood pressure in SHR
B. Tesfamariam and M. L. Ogletree H189

Agonist and membrane depolarization induced activation of MAP kinase in the swine carotid artery
S. S. Katoch and R. S. Moreland H222

Modulation of resistance artery force generation by extracellular Ca^{2+}
K. Bian and R. D. Bukoski H230

Inhibition of vascular nitric oxide-cGMP pathway by plasma from ischemic hindlimb of rats
J.-S. Jin, R. C. Webb, and L. G. D'Alecy H254

Regulation of membrane potential and diameter by voltage-dependent K^+ channels in rabbit myogenic cerebral arteries
H. J. Knot and M. T. Nelson H348

Regulation of PDGF-A: a possible mechanism for angiotensin II-induced vascular growth
D. H. Wang, R. L. Prewitt, and S. J. Beebe H356

Physiological relevance of T-tube model parameters with emphasis on arterial compliances
S. G. Shroff, D. S. Berger, C. Korcarz, R. M. Lang, R. H. Marcus, and D. E. Miller H365

High correlation of fractals for regional blood flows among resting and exercising skeletal muscles
P. O. Iversen and G. Nicolaysen H7

Arginine-nitric oxide pathway and cerebrovascular regulation in cortical spreading depression
M. Fabricius, N. Akgoren, and M. Lauritzen H23

Alteration of testicular microvascular pressures during venous pressure elevation
T. E. Sweeney, J. S. Rozum, and R. W. Gore H37

Postural vascular response vs. sympathetic vasoconstriction in human skin during orthostasis
H. Jepsen and P. Gaehtgens H53

Nitric oxide and prostaglandins interact to mediate arteriolar dilation during cortical spreading depression
W. Meng, D. M. Colonna, J. R. Tobin, and D. W. Busija H176

Pentoxifylline inhibits FMLP-induced macromolecular leakage
K. Nakagawa, F. N. Miller, A. W. Knott, and M. J. Edwards H239

Noninvasive measurements of albumin flux into lung interstitium with increased microvascular pressure
V. J. Abernathy, N. A. Pou, T. L. Wilson, and R. J. Roselli H288

Modification of cerebral laser-Doppler flow oscillations by halothane, P_{CO_2}, and nitric oxide synthase blockade
A. G. Hudetz, J. J. Smith, J. G. Lee, Z. J. Bosnjak, and J. P. Kampine H114

In vivo production of nitric oxide correlates with NMDA-induced cerebral hyperemia in newborn sheep
F. J. Northington, J. R. Tobin, R. C. Koehler, and R. J. Traystman H215

Effect of exercise on coronary pressure-flow relationship in hypertrophied left ventricle
D. J. Duncker, J. Zhang, T. J. Pavek, M. J. Crampton, and R. J. Bache H271

Effect of nitric oxide synthase inhibition on postischemic cerebral hyperemia
R. S. Greenberg, M. A. Helfaer, J. R. Kirsch, and R. J. Traystman H341

Alterations in systemic arterial mechanical properties during septic shock: role of fluid resuscitation
B. P. Cholley, R. M. Lang, D. S. Berger, C. Korcarz, D. Payen, and S. G. Shroff H375

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Role of natriuretic peptide clearance receptor in in vivo control of C-type natriuretic peptide
R. R. Brandt, D. M. Heublein, L. L. Aarhus, J. A. Lewicki, and J. C. Burnett, Jr. H326

Participation of hypothalamic paraventricular nucleus in locus ceruleus-induced baroreflex suppression in rats
C.-D. Shih, S. H. H. Chan, and J. Y. H. Chan H46

Paraventricular nucleus histamine increases blood pressure by adrenoreceptor stimulation of vasopressin release
S. L. Bealer and S. O. Abell H80

Differential effect of 5- and 15-lipoxygenase products on ischemically sensitive abdominal visceral afferents
H.-L. Pan, G. L. Stahl, and J. C. Longhurst H96

Central cardiovascular effects induced by intracisternal PACAP in dogs
Y. Seki, Y. Suzuki, M. K. Baskaya, K. Saito, M. Takayasu, M. Shibuya, and K. Sugita H135

Antihypertensive actions of angiotensin-(1—7) in spontaneously hypertensive rats
I. F. Benter, C. M. Ferrario, M. Morris, and D. I. Diz H313

Hemodynamic basis of oscillations in systemic arterial pressure in conscious rats
B. J. A. Janssen, J. Oosting, D. W. Slaaf, P. B. Persson, and H. A. J. Struijker-Boudier H62

Effects of renal denervation on cardiovascular response to furosemide in conscious lambs
F. G. Smith and A. M. Strack H149

Baseline arterial pressure affects sympathoexcitatory responses to ventricular premature beats
M. L. Smith, K. A. Ellenbogen, and D. L. Eckberg H153

Regional epinephrine kinetics in human heart failure: evidence for extra-adrenal, nonneural release
D. M. Kaye, J. Lefkovits, H. Cox, G. Lambert, G. Jennings, A. Turner, and M. D. Esler H182

Adenosine modulates hypoxia-induced atrial natriuretic peptide release in fetal sheep
D. A. Ogunyemi, B. J. Koos, C. P. Arora, L. C. Castro, and B. A. Mason H282

No. 2. AUGUST 1995

CARDIAC PHYSIOLOGY

A rapidly activating delayed rectifier K^+ channel in rabbit sinoatrial node cells
H. Ito and K. Ono H443

Role of rapidly activating delayed rectifier K^+ current in sinoatrial node pacemaker activity
K. Ono and H. Ito H453

Comparative mechanisms of 4-aminopyridine-resistant I_{to} in human and rabbit atrial myocytes
G.-R. Li, J. Feng, Z. Wang, B. Fermini, and S. Nattel H463

Delayed rectifier K^+ current in rabbit atrial myocytes
K. Muraki, Y. Imaizumi, M. Watanabe, Y. Habuchi, and W. R. Giles H524

4-Aminopyridine block of the noninactivating cloned K^+ channel Kv1.5 expressed in *Xenopus* oocytes
T. Yamane, T. Furukawa, and M. Hiraoka H556

Isoproterenol infusion induces alterations in expression of hypertrophy-associated genes in rat heart
M. O. Boluyt, X. Long, T. Eschenhagen, U. Mende, W. Schmitz, M. T. Crow, and E. G. Lakatta H638

Double-exponential curve fitting of isometric relaxation: a new measure for myocardial lusitropism
K. Tamiya, T. Beppu, and K. Ishihara H393

Laminar structure of the heart: ventricular myocyte arrangement and connective tissue architecture in the dog
I. J. LeGrice, B. H. Smaill, L. Z. Chai, S. G. Edgar, J. B. Gavin, and P. J. Hunter H571

Force, not sarcomere length, correlates with prolongation of isosarcometric contraction
P. M. L. Janssen and W. C. Hunter H676

Effect of BDM, verapamil, and cardiac work on mitochondrial membrane potential in perfused rat hearts
C. Doumen, B. Wan, and O. Ondrejickova H515

Alleviation of contractile dysfunction in ischemic hearts by slowly inactivating Na^+ current blockers
B. Le Grand, B. Vie, J. M. Talmant, E. Coraboeuf, and G. W. John H533

Hypoxia-induced activation of K_{ATP} channels limits energy depletion in the guinea pig heart **(Special Communication)**
U. K. M. Decking, T. Reffelmann, J. Schrader, and H. Kammermeier H734

On the fractal nature of heart rate variability in humans: effects of respiratory sinus arrhythmia
Y. Yamamoto, J.-O. Fortrat, and R. L. Hughson H480

Mechanical determinants of myocardial oxygen consumption in conscious dogs
J. R. Elbeery, J. C. Lucke, M. P. Feneley, G. W. Maier, C. H. Owen, R. E. Lilly, M. A. Savitt, M. St. J. Hickey, S. A. Gall, Jr., J. W. Davis, P. Vantrigt, J. S. Rankin, and D. D. Glower H609

Reduced parasympathetic control of heart rate in obese dogs
B. N. Van Vliet, J. E. Hall, H. L. Mizelle, J.-P. Montani, and M. J. Smith, Jr. H629

Advantages of continuous measurement of cardiac output 24 h a day
J.-P. Montani, H. L. Mizelle, B. N. Van Vliet, and T. H. Adair H696

VASCULAR PHYSIOLOGY

Constitutive NOS expression in cultured endothelial cells is elevated by fluid shear stress
V. Ranjan, Z. Xiao, and S. L. Diamond H550

Angiotensin II mediates a sustained rise in nuclear and cytoplasmic calcium via multiple receptor subtypes
D. H. Munzenmaier and A. S. Greene H565

Altered regulation of nerve growth factor secretion by cultured VSMCs from hypertensive rats
J. M. Spitsbergen, J. S. Stewart, and J. B. Tuttle H621

Oxidative-stress response in vascular endothelial cells exposed to acellular hemoglobin solutions
R. Motterlini, R. Foresti, K. Vandegriff, M. Intaglietta, and R. M. Winslow H648

Proliferation and migration of endothelial cells is promoted by endothelins via activation of ET_B receptors
L. Morbidelli, C. Orlando, C. A. Maggi, F. Ledda, and M. Ziche H686

Structural changes and in situ aortic pressure-diameter relationship in long-term chemical-sympathectomized rats
P. Lacolley, E. Glaser, P. Challande, P. Boutouyrie, J.-P. Mignot, M. Duriez, B. Levy, M. Safar, and S. Laurent H407

Biaxial mechanics of excised canine pulmonary arteries
J. C. Debes and Y. C. Fung H433

Myocardial and endothelial protection by TMS in ischemia-reperfusion injury
T. Murohara, M. Buerke, J. Margiotta, F. Ruan, Y. Igarashi, S.-I. Hakomori, and A. M. Lefer H504

Adenosine potentiates flow-induced dilation of coronary arterioles by activating K_{ATP} channels in endothelium
L. Kuo and J. D. Chancellor H541

Effects of PKC downregulation on norepinephrine- and prostaglandin $F_{2\alpha}$-induced contraction in rat aorta
R. M. Rapoport, A. K. Campbell, and E. Bazan H590

Complexity of chaotic vasomotion is insensitive to flow and pressure but can be regulated by external control
T. M. Griffith and D. H. Edwards H656

PAF induces relaxation of pulmonary arteries but contraction of pulmonary veins in the ferret
Y. Gao, H. Zhou, and J. U. Raj H704

Oxygen tension may be crucial in relaxation of the human umbilical artery **(Letters to the Editor)**
K. Stuart-Smith; C. M. Brophy H749

Radial columns in autoradiographs generated from tracer methods for measuring cerebral cortical blood flow
R. M. Bryan, Jr. and R. B. Duckrow H583

Effect of norepinephrine and acetylcholine on outer medullary descending vasa recta
S. Yang, E. P. Silldorff, and T. L. Pallone H710

Long-term electrical stimulation of rabbit skeletal muscle increases growth of paired arteries and veins
T. H. Adair, J. Hang, M. L. Wells, F. D. Magee, and J.-P. Montani H717

Fluorescent microspheres to measure organ perfusion: validation of a simplified sample processing technique **(Special Communication)**
M. F. M. van Oosterhout, H. M. M. Willigers, R. S. Reneman, and F. W. Prinzen H725

Ischemia-reperfusion-induced alteration of blood-brain barrier transport in newborn pigs **(Letters to the Editor)**
P. Temesvári, F. Joó, J. Kovács, and C. S. Ábrahám H750

Cat brain cytochrome-*c* oxidase redox changes induced by hypoxia after blood-fluorocarbon exchange transfusion
M. Ferrari, M. A. Williams, D. A. Wilson, N. V. Thakor, R. J. Traystman, and D. F. Hanley H417

Dipyridamole, a cGMP phosphodiesterase inhibitor, causes pulmonary vasodilation in the ovine fetus
J. W. Ziegler, D. D. Ivy, J. J. Fox, J. P. Kinsella, W. R. Clarke, and S. H. Abman H473

Endothelin receptor A blockade alters hemodynamic response to nitric oxide inhibition in rats **(Rapid Communication)**
A. Thompson, C. R. Valeri, and W. Lieberthal H743

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Dopamine depletion protects striatal neurons from heatstroke-induced ischemia and cell death in rats
M. T. Lin, T. Y. Kao, C. C. Chio, and Y. T. Jin H487

Role of cyclooxygenase metabolites in mediating platelet-induced baroreceptor dysfunction
Z. Li, X. Su, and M. W. Chapleau H599

Regional systemic ANP differences in fetal lambs: role of coronary sinus outflow distribution
J. J. Smolich and R. L. Woods H669

Central angiotensin II AT_1-receptor antagonism in normal and heart-failed sheep
M. T. Rademaker, M. A. Fitzpatrick, C. J. Charles, C. M. Frampton, A. M. Richards, M. G. Nicholls, and E. A. Espiner H425

Splenic contraction-induced increases in arterial O_2 reduce requirement for CBF in conscious dogs
N. Sato, Y.-T. Shen, K. Kiuchi, R. P. Shannon, and S. F. Vatner H491

No. 3. SEPTEMBER 1995

CANNON LECTURE

Introduction H753

Cardiac muscle diseases in genetically engineered mice: evolution of molecular physiology
K. R. Chien H755

CARDIAC PHYSIOLOGY

Characterization of Ca^{2+}-release channels in fetal and adult rat hearts
V. Ramesh, M. J. Kresch, A. M. Katz, and D. H. Kim H778

An ATP-activated nonselective cation channel in guinea pig ventricular myocytes
K. E. Parker and A. Scarpa H789

Transmembrane mechanochemical coupling in cardiac myocytes: novel activation of G_i by hyposmotic swelling
R. Hilal-Dandan and L. L. Brunton H798

Cardiac myocytes release leukocyte-stimulating factors
K. D. Massey, R. M. Strieter, S. L. Kunkel, J. M. Danforth, and T. J. Standiford H980

Expression of protein kinase C isoforms during cardiac ventricular development
A. Clerk, M. A. Bogoyevitch, S. J. Fuller, A. Lazou, P. J. Parker, and P. H. Sugden H1087

Spatiotemporal changes of Ca^{2+} during electrically evoked contractions in atrial and ventricular cells **(Rapid Communication)**
J. R. Berlin H1165

Sarcoplasmic reticulum in cardiac length-dependent activation in rabbits
W. F. Bluhm and W. Y. W. Lew H965

Dynamic changes in $G\alpha_{i-2}$ levels in rat hearts associated with impaired heart function after myocardial infarction
B. Shi, J. E. Heavner, K. K. McMahon, and J. E. Spallholz H1073

Overdrive suppression of spontaneously beating chick heart cell aggregates: experiment and theory **(Modeling in Physiology)**
A. Kunysz, L. Glass, and A. Shrier H1153

Increase of cardiac work is associated with decrease of mitochondrial NADH
J. F. Ashruf, J. M. C. C. Coremans, H. A. Bruining, and C. Ince H856

Primary negativity does not predict dominant pacemaker location: implications for sinoatrial conduction
B. I. Bromberg, D. E. Hand, R. B. Schuessler, and J. P. Boineau H877

Ischemia- and reperfusion-sensitive cardiac sympathetic afferents: influence of H_2O_2 and hydroxyl radicals
H.-S. Huang, H.-L. Pan, G. L. Stahl, and J. C. Longhurst H888

Effects of atrial pacing site on rate-dependent AV nodal function in rabbit hearts
F. Amellal and J. Billette H934

Inhibition of the creatine kinase reaction decreases the contractile reserve of isolated rat hearts
B. L. Hamman, J. A. Bittl, W. E. Jacobus, P. D. Allen, R. S. Spencer, R. Tian, and J. S. Ingwall H1030

Cardiac energetics, cell volumes, sodium fluxes, and membrane permeability: NMR studies of cold ischemia
N. Askenasy, A. Vivi, M. Tassini, and G. Navon H1056

Inhibition of collagen cross-linking: effects on fibrillar collagen and ventricular diastolic function
S. Kato, F. G. Spinale, R. Tanaka, W. Johnson, G. Cooper IV, and M. R. Zile H863

Measurement of right ventricular volume by conductance catheter in closed-chest pigs
T. M. Stamato, R. S. Szwarc, and L. N. Benson H869

Fibroblast proliferation during myocardial development in rats is regulated by IGF-1 receptors
K. Reiss, W. Cheng, J. Kajstura, E. H. Sonnenblick, L. G. Meggs, and P. Anversa H943

Different effects of histamine H_1 and H_2 stimulation on left ventricular contractility in pigs
D. J. Cooper, R. R. Schellenberg, and K. R. Walley H959

Endotoxin-induced left ventricular depression is blocked by nitrogen mustard or dimethylthiourea in rabbits
Y. Nishikawa and W. Y. W. Lew H1098

Regional wall motion and strain analysis across stages of Fontan reconstruction by magnetic resonance tagging
M. A. Fogel, K. B. Gupta, P. M. Weinberg, and E. A. Hoffman H1132

VASCULAR PHYSIOLOGY

A human calcium-activated potassium channel gene expressed in vascular smooth muscle
D. P. McCobb, N. L. Fowler, T. Featherstone, C. J. Lingle, M. Saito, J. E. Krause, and L. Salkoff H767

NOS expression is increased in endothelial cells exposed to plasma from women with preeclampsia
S. T. Davidge, P. N. Baker, and J. M. Roberts H1106

Enhanced role of K^+ channels in relaxations of hypercholesterolemic rabbit carotid artery to NO
S. Najibi, and R. A. Cohen H805

Effect of aging and hypertension on contractility of resistance arteries: modulation by endothelial factors
M. G. Lang, G. Noll, and T. F. Lüscher H837

Endothelial dysfunction in a model of hyperglycemia and hyperinsulinemia
G. M. Pieper, D. A. Meier, and S. R. Hager H845

Evidence for NO involvement in regulating vascular reactivity in balloon-injured rat carotid artery
T. C. Major, R. W. Overhiser, and R. L. Panek H988

Decreased endothelium-dependent relaxation in subarachnoid hemorrhage-induced vasospasm: role of ET-1
M. Zuccarello, A. Romano, M. Passalacqua, and R. M. Rapoport H1009

Mechanisms of vascular preservation by a novel NO donor following rat carotid artery intimal injury
J.-P. Guo, M. M. Panday, P. M. Consigny, and A. M. Lefer H1122

Permissive role of NO in α_2-adrenoceptor-mediated dilations in rat cerebral arteries **(Rapid Communication)**
R. M. Bryan, Jr., M. L. Steenberg, M. Y. Eichler, T. D. Johnson, M. W. G. Swafford, and M. S. Suresh H1171

Mechanisms of endotoxin-induced dilatation of cerebral arterioles
J. E. Brian, Jr., D. D. Heistad, and F. M. Faraci H783

Selective binding of platelet factor 4 to regions of active angiogenesis in vivo
P. Hansell, T. E. Maione, and P. Borgström H829

Opioids contribute to hypoxia-induced pial artery dilation through activation of ATP-sensitive K^+ channels
V. Shankar and W. M. Armstead H997

Capillary diameter changes during low perfusion pressure and reactive hyperemia in rabbit skeletal muscle
J. Bosman, G.-J. Tangelder, M. G. A. oude Egbrink, R. S. Reneman, and D. W. Slaaf H1048

Nitric oxide does not mediate autoregulation of retinal blood flow in newborn pig
J. M. Gidday and Y. Zhu H1065

Comparison of myocardial ATP, blood flow, and cytosolic adenosine in demand ischemia and coronary occlusion
K. Kroll and G. V. Martin H819

Effect of L-NMMA, cromakalim, and glibenclamide on cerebral blood flow in hypercapnia and hypoxia
J. M. Reid, A. G. Davies, F. M. Ashcroft, and D. J. Paterson H916

Effects of inhibiting neutral endopeptidase and kininase II on coronary and systemic hemodynamics in rats
A. J. Maxwell, W. K. Husseini, G. Piedimonte, and J. I. E. Hoffman H1016

Polystyrene microspheres decrease bronchial artery resistance in anesthetized sheep
D. B. Pearse, H. E. Fessler, and E. M. Wagner H1037

Intracoronary nitric oxide improves postischemic coronary blood flow and myocardial contractile function
R. Pabla, A. J. Buda, D. M. Flynn, D. B. Salzberg, and D. J. Lefer H1113

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Age-associated increase in rat ventricular ANP gene expression correlates with cardiac hypertrophy
A. Younes, M. O. Boluyt, L. O'Neill, A. L. Meredith, M. T. Crow, and E. G. Lakatta H1003

Determinants of respiratory sinus arrhythmia in the vagotomized rabbit
S. Perlini, P. L. Soldá, M. Piepoli, G. Sala-Gallini, A. Calciati, G. Finardi, and L. Bernardi H909

Cardiac rhythmicity among NTS neurons and its relationship to sympathetic outflow in rabbits
L. F. Hayward and R. B. Felder H923

Antagonism of vasopressin V_1 receptors in NTS attenuates baroreflex control of renal nerve activity
A. A. Hegarty and R. B. Felder H1080

Losartan improves baroreflex control of heart rate of coarcted hypertensive rats
C. M. Santos, V. Pontieri, M. L. Neto, and L. C. Michelini H812

The role of nitric oxide in the baroreceptor-cardiac reflex in conscious Wistar rats
N. Minami, Y. Imai, J.-I. Hashimoto, and K. Abe H851

Downregulation of atrial natriuretic factor clearance receptors in experimental chronic renal failure rats
J. K. H. Luk, E. F. C. Wong, and N. L. M. Wong H902

Cardiorespiratory transfer during sleep: a study in healthy young men
P. van de Borne, P. Biston, M. Païva, H. Nguyen, P. Linkowski, and J.-P. Degaute H952

Diastolic time: an important determinant of regional arterial blood flow
K. W. Saupe, C. A. Smith, K. S. Henderson, and J. A. Dempsey H973

Effect of central infusion of benzamil on Dahl S rat hypertension
E. P. Gomez-Sanchez and C. E. Gomez-Sanchez H1044

No. 4. OCTOBER 1995

EDITORIAL

Times of change
L. R. Johnson H1175

CARDIAC PHYSIOLOGY

Abnormalities of K^+ and Ca^{2+} currents in ventricular myocytes from rats with chronic diabetes
D. W. Wang, T. Kiyosue, S. Shigematsu, and M. Arita H1288

Different properties of the atrial G protein-gated K^+ channels activated by extracellular ATP and adenosine
C. Fu, A. Pleumsamran, U. Oh, and D. Kim H1349

Biaxial mechanical behavior of excised porcine mitral valve leaflets
K. May-Newman and F. C. P. Yin H1319

Activation delay in healed myocardial infarction: a comparison between model and experiment
N. Maglaveras, J. M. T. de Bakker, F. J. L. van Capelle, C. Pappas, and M. J. Janse H1441

Effects of ischemic and adenosine preconditioning on interstitial fluid adenosine and myocardial infarct size
R. D. Lasley, P. J. Konyn, J. O. Hegge, and R. M. Mentzer, Jr. H1460

Coronary flow stimulates auricular-ventricular transmission in the isolated perfused guinea pig heart
R. Rubio, G. Ceballos, and J. Suarez H1177

Mechanisms of conduction time hysteresis in rabbit atrioventricular node
J. Billette, J. Zhao, and A. Shrier H1258

Role of bradykinin in cardiac functional protection after global ischemia-reperfusion in rat heart
E. C. Brew, M. B. Mitchell, T. F. Rehring, F. Gamboni-Robertson, R. C. McIntyre, Jr., A. H. Harken, and A. Banerjee H1370

Preconditioning accelerates contracture and ATP depletion in blood-perfused rat hearts
K. G. Kolocassides, M. Galiñanes, and D. J. Hearse H1415

Relationship of simultaneous atrial and ventricular pressures in stage 16–27 chick embryos
N. Hu and B. B. Keller H1359

Vasoactive intestinal polypeptide antagonists attenuate vagally induced tachycardia in the anesthetized dog
M. R. S. Hill, D. W. Wallick, L. R. Mongeon, P. J. Martin, and M. N. Levy H1467

Nature of heart failure in patients with ventricular septal defect
J. M. Stewart, T. H. Hintze, P. K. Woolf, M. S. Snyder, K. P. Seligman, and M. H. Gewitz H1473

VASCULAR PHYSIOLOGY

Ca^{2+}-dependent K^+ current in arterial smooth muscle cells from aldosterone-salt hypertensive rats
Y. Liu, A. W. Jones, and M. Sturek H1246

Impaired arginine metabolism and NO synthesis in coronary endothelial cells of the spontaneously diabetic BB rat
G. Wu and C. J. Meininger H1312

Adhesion of flowing neutrophils to cultured endothelial cells after hypoxia and reoxygenation in vitro
G. E . Rainger, A. Fisher, C. Shearman, and G. B. Nash H1398

Gap junction function in vascular smooth muscle: influence of serotonin
L. K. Moore and J. M. Burt H1481

Various cells release a stable small molecule that inhibits endothelium-dependent relaxation
J. J. Liu, B. Xie, P. J. Thurlow, J. S. Wiley, and J. R. Chen H1303

Scatter in input impedance spectrum may result from the elastic nonlinearity of the arterial wall **(Special Communication)**
N. Stergiopulos, J.-J. Meister, and N. Westerhof H1490

NBT reactivity correlates to the distribution of PMNs between rat pulmonary and systemic circulation
T. Wikström, M. Braide, U. Bagge, and B. Risberg H1195

Age-related changes in perimicrovascular protein distribution
B. J. Barber, S. Dutta, S. Parameswaran, and R. A. Babbitt H1213

Direct detection and quantification of singlet oxygen during ischemia and reperfusion in rat hearts
X. Zhai and M. Ashraf H1229

Activation of angiotensin-converting enzyme expression in infarct zone following myocardial infarction
R. C. J. J. Passier, J. F. M. Smits, M. J. A. Verluyten, R. Studer, H. Drexler, and M. J. A. P. Daemen H1268

Thoracic duct lymph flow responses to hemorrhage in the ovine fetus
R. A. Brace H1277

Recognition of consensus CHO structure in ligands for selectins by novel antibody against sialyl Lewis X
T. Tamatani, M. Suematsu, K. Tezuka, N. Hanzawa, T. Tsuji, Y. Ishimura, R. Kannagi, S. Toyoshima, and M. Homma H1282

Acute effects of glucose on reactivity of cerebral microcirculation: role of activation of protein kinase C
W. G. Mayhan and K. P. Patel H1297

Determination of myoglobin saturation of frozen specimens using a reflecting cryospectrophotometer
W. A. Voter and T. E. J. Gayeski H1328

Resting oxygenation of rat and rabbit intestine: arteriolar and capillary contributions
H. G. Bohlen and J. M. Lash H1342

Prolonged leukocyte transit time in coronary microcirculation of endotoxemic pigs
C. M. Goddard, M. F. Allard, J. C. Hogg, M. J. Herbertson, and K. R. Walley H1389

Flow-dependent arteriolar dilation in normotensive rats fed low- or high-salt diets
M. A. Boegehold H1407

Laser-Doppler perfusion imaging of microvascular blood flow in rabbit tenuissimus muscle **(Special Communication)**
M. Lindén, A. Sirsjö, L. Lindbom, G. Nilsson, and A. Gidlöf H1496

Restoration of normal pH triggers ischemia-reperfusion injury in lung by Na^+/H^+ exchange activation **(Rapid Communication)**
T. M. Moore, P. L. Khimenko, and A. E. Taylor H1501

Role of angiotensin-converting enzyme and angiotensin II in development of hypoxic pulmonary hypertension
N. W. Morrell, K. G. Morris, and K. R. Stenmark H1186

Changes in contractility and afterload have only slight effects on subendocardial systolic flow impediment
S. Iwanaga, S. G. Ewing, W. K. Husseini, and J. I. E. Hoffman H1202

Downward shift of coronary pressure-flow relationship following a brief period of ischemia in dogs
T. Morioka, M. Kitakaze, T. Minamino, S. Takashima, K. Node, Y. Okazaki, H. Sato, Y. Shinozaki, M. Chujo, H. Mori, K. Miyazaki, M. Inoue, M. Hori, and T. Kamada H1237

Pressure wave propagation in a multibranched model of the human upper limb
M. Karamanoglu, D. E. Gallagher, A. P. Avolio, and M. F. O'Rourke H1363

Effects of indomethacin on brain blood flow, cerebral metabolism, and sagittal sinus prostanoids after hypoxia
M. G. Coyle, W. Oh, K. H. Petersson, and B. S. Stonestreet H1450

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Role of NO mechanism in cardiovascular effects of diaspirin cross-linked hemoglobin in anesthetized rats
A. C. Sharma, G. Singh, and A. Gulati H1379

Captopril-induced hypotension is inhibited by the bradykinin blocker HOE-140 in Na^+-depleted marmosets
M. J. Panzenbeck, C. L. Loughnan, J. B. Madwed, R. J. Winquist, and S. E. Fogal H1221

NMDA receptors in NTS are involved in bradycardic but not in pressor response of chemoreflex
A. S. Haibara, E. Colombari, D. A. Chianca, Jr., L. G. H. Bonagamba, and B. H. Machado H1421

Muscle metaboreceptors in hemodynamic, autonomic, and ventilatory responses to exercise in men
M. Piepoli, A. L. Clark, and A. J. S. Coats H1428

Influence of respiration on metabolic, hemodynamic, psychometric, and R-R interval power spectral parameters
R. E. De Meersman, S. S. Reisman, M. Daum, R. Zorowitz, M. Leifer, and T. Findley H1437

No. 5. NOVEMBER 1995

CARDIAC PHYSIOLOGY

Endothelial inhibition of myofilament calcium response in intact cardiac myocytes
C. B. Pepper, D. Lang, M. J. Lewis, and A. M. Shah H1538

Effects of thiol-modifying agents on K_{ATP} channels in guinea pig ventricular cells
W. A. Coetzee, T. Y. Nakamura, and J.-F. Faivre H1625

Effects of diabetes on isometric tension as a function of $[Ca^{2+}]$ and pH in rat skinned cardiac myocytes
P. A. Hofmann, V. Menon, and K. F. Gannaway H1656

Evaluation of T- and L-type Ca^{2+} currents in shark ventricular myocytes
J. Maylie and M. Morad H1695

Modulation of pacemaker activity of sinoatrial node cells by electrical load imposed by an atrial cell model
E.-I. Watanabe, H. Honjo, T. Anno, M. R. Boyett, I. Kodama, and J. Toyama H1735

Nifedipine inhibits movement of cardiac calcium channels through late, but not early, gating transitions
R. W. Hadley and W. J. Lederer H1784

Identification and activation of autocrine renin-angiotensin system in adult ventricular myocytes
X. Zhang, D. E. Dostal, K. Reiss, W. Cheng, J. Kajstura, P. Li, H. Huang, E. H. Sonnenblick, L. G. Meggs, K. M. Baker, and P. Anversa H1791

Inotropic effects of α_1-adrenergic agonists in myocardium from rats with postinfarction heart failure
S. E. Litwin, D. E. Vatner, and J. P. Morgan H1553

Reduced threshold for myocardial cell calcium intolerance in the rat heart with aging
O. Hano, K. Y. Bogdanov, M. Sakai, R. G. Danziger, H. A. Spurgeon, and E. G. Lakatta H1607

Papillary muscles split in the presence of 2,3-butanedione monoxime have normal energetic and mechanical properties
H. Kiriazis and C. L. Gibbs H1685

Ischemic preconditioning inhibits glycolysis and proton production in isolated working rat hearts
B. A. Finegan, G. D. Lopaschuk, M. Gandhi, and A. S. Clanachan H1767

VASCULAR PHYSIOLOGY

Endothelial inhibition of myofilament calcium response in intact cardiac myocytes
C. B. Pepper, D. Lang, M. J. Lewis, and A. M. Shah H1538

Basic fibroblast growth factor increases nitric oxide synthase production in bovine endothelial cells
S. K. Kostyk, S. Kourembanas, E. L. Wheeler, D. Medeiros, L. P. McQuillan, P. A. D'Amore, and S. J. Braunhut H1583

ATP-sensitive K^+ currents in cerebral arterial smooth muscle: pharmacological and hormonal modulation
T. Kleppisch and M. T. Nelson H1634

Multiple growth factors are released from mechanically injured vascular smooth muscle cells
S. T. Crowley, C. J. Ray, D. Nawaz, R. A. Majack, and L. D. Horwitz H1641

Albumin reduces basement membrane hydraulic conductance in part due to arginyl side groups
M. A. Katz and M. L. La Marche H1514

Role of myosin phosphorylation and $[Ca^{2+}]_i$ in myogenic reactivity and arteriolar tone
H. Zou, P. H. Ratz, and M. A. Hill H1590

Adenosine A_1 receptor-induced upregulation of protein kinase C: role of pertussis toxin-sensitive G protein(s)
R. B. Marala and S. J. Mustafa H1619

Role of nitric oxide in adenosine receptor-mediated relaxation of porcine coronary artery
W. Abebe, T. Hussain, H. Olanrewaju, and S. J. Mustafa H1672

Endothelium-dependent and -independent vasodilation of isolated rat aorta induced by caffeine
Y. Hatano, K. Mizumoto, T. Yoshiyama, M. Yamamoto, and H. Iranami H1679

Development and prevention of skeletal muscle structural alterations after experimental myocardial infarction
B. Schieffer, K. C. Wollert, M. Berchtold, K. Saal, E. Schieffer, B. Hornig, U. N. Riede, and H. Drexler H1507

Response of cerebral blood vessels to an endogenous inhibitor of nitric oxide synthase
F. M. Faraci, J. E. Brian, Jr., and D. D. Heistad H1522

Changes in endothelial actin cytoskeleton in venules with time after histamine treatment
A. L. Baldwin and G. Thurston H1528

Permissive role for nitric oxide in active thermoregulatory vasodilation in rabbit ear
D. M. Farrell and V. S. Bishop H1613

The stable VIP analogue, Ro 24–9981, potentiates bradykinin-induced increases in clearance of macromolecules
X.-P. Gao and I. Rubinstein H1648

Structure and hemodynamics of microvascular networks: heterogeneity and correlations
A. R. Pries, T. W. Secomb, and P. Gaehtgens H1713

Conducted vasodilation elevates flow in arteriole networks of hamster striated muscle
D. T. Kurjiaka and S. S. Segal H1723

Fructose-1,6-diphosphate or adenosine attenuate leukocyte adherence in postischemic skeletal muscle
T. Akimitsu, J. A. White, D. L. Carden, D. C. Gute, and R. J. Korthuis H1743

Effect of acadesine treatment on postischemic damage to small intestine
M. H. Schoenberg, B. Poch, D. Moch, M. Marzinzig, E. Marzinzig, T. Mattfeldt, H. Gruber, and H. G. Beger H1752

Influence of brain injury on opioid-induced pial artery vasodilation
M. C. Thorogood and W. M. Armstead H1776

L-NNA suppresses cerebrovascular response and evoked potentials during somatosensory stimulation in rats
A. C. Ngai, J. R. Meno, and H. R. Winn H1803

Pulmonary vascular extraction and distribution of antipyrine with alveolar flooding
W. O. Cua, V. Bower, C. Tice, and F. P. Chinard H1811

Microvascular blood volume-to-flow relationships in porcine heart wall: whole body CT evaluation in vivo **(Special Communication)**
Y.-H. Liu, R. C. Bahn, and E. L. Ritman H1820

VEGF gene expression is upregulated in electrically stimulated rat skeletal muscle **(Rapid Communication)**
J. Hang, L. Kong, J.-W. Gu, and T. H. Adair H1827

High muscle blood flows are not attenuated by recruitment of additional muscle mass
R. S. Richardson, B. Kennedy, D. R. Knight, and P. D. Wagner H1545

Regional vascular reserve in canine atria and ventricles during rest and exercise
R. P. Bauman, J. C. Rembert, and J. C. Greenfield, Jr. H1578

Role of K^+_{ATP} channels and EDRF in reactive hyperemia in the hindquarters vascular bed of cats
R. K. Minkes, J. A. Santiago, T. J. McMahon, and P. J. Kadowitz H1704

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Catecholamine response to chronic ANG II infusion and its role in myocyte and coronary vascular damage
J. R. Henegar, G. L. Brower, A. Kabour, and J. S. Janicki H1564

Role of endogenous opioids and serotonin in the hemodynamic response to hemorrhage during hypoxia
T. C. Resta, J. M. Resta, and B. R. Walker H1597

Reflex control of vasopressin during hemorrhage in hypertensive rabbits
C. A. Courneya and G. Weichert H1570

Adrenergic responsiveness is reduced, while baseline cardiac function is preserved in old adult conscious monkeys
N. Sato, K. Kiuchi, Y.-T. Shen, S. F. Vatner, and D. E. Vatner H1664

Autonomic and ventilatory components of heart rate and blood pressure variability in freely behaving rats
S. Perlini, F. Giangregorio, M. Coco, A. Radaelli, P. L. Soldà, L. Bernardi, and A. U. Ferrari H1729

Complexity and "chaos" in blood pressure after baroreceptor denervation of conscious dogs
C. D. Wagner, R. Mrowka, B. Nafz, and P. B. Persson H1760

No. 6. DECEMBER 1995

CARDIAC PHYSIOLOGY

cGMP elevation does not mediate muscarinic agonist-induced negative inotropy in rat ventricular cardiomyocytes
K. L. MacDonell, G. F. Tibbits, and J. Diamond H1905

DNA synthesis and multinucleation in embryonic stem cell-derived cardiomyocytes
M. G. Klug, M. H. Soonpaa, and L. J. Field H1913

cAMP enhances inducible nitric oxide synthase mRNA stability in cardiac myocytes
C. V. Oddis, R. L. Simmons, B. G. Hattler, and M. S. Finkel H2044

Differential expression of α- and β-enolase genes during rat heart development and hypertrophy
A. Keller, J.-D. Rouzeau, F. Farhadian, C. Wisnewsky, F. Marotte, N. Lamandé, J.-L. Samuel, K. Schwartz, M. Lazar, and M. Lucas H1843

Differential regulation of G protein expression in rat hearts exposed to chronic hypoxia
R. Kacimi, J.-M. Moalic, A. Aldashev, D. E. Vatner, J.-P. Richalet, and B. Crozatier H1865

PKC mediates LPS- and phorbol-induced cardiac cell nitric oxide synthase activity and hypocontractility
T. M. McKenna, S. Li, and S. Tao H1891

NMR spectroscopy studies of severe hypokalemia in isolated rat hearts
E. W. Peterson, K. G. Chen, N. Elkins, R. B. Hutchison, and J. I. Shapiro H1981

Effects of chemical subendocardial ablation on activation rate gradient during ventricular fibrillation
Y.-M. Cha, T. Uchida, P. L. Wolf, B. B. Peters, M. C. Fishbein, H. S. Karagueuzian, and P.-S. Chen H1998

Filling characteristics of left ventricle in newborn lambs
H. Velvis and H. S. Klopfenstein H2039

Increased ACE and chymase-like activity in cardiac tissue of dogs with chronic mitral regurgitation
L. J. Dell'Italia, Q. C. Meng, E. Balcells, I. M. Straeter-Knowlen, G. H. Hankes, R. Dillon, R. E. Cartee, R. Orr, S. P. Bishop, S. Oparil, and T. S. Elton H2065

Mechanism of mitral leaflet excursion
J. M. Dent, W. D. Spotnitz, S. P. Nolan, A. R. Jayaweera, W. P. Glasheen, and S. Kaul H2100

Explorations into development of a neurally regulated cardiac pacemaker **(Special Communication)**
Y. Ikeda, M. Sugimachi, T. Yamasaki, O. Kawaguchi, T. Shishido, T. Kawada, J. Alexander, Jr., and K. Sunagawa H2141

Myocardial ischemia and reperfusion: a murine model **(Special Communication)**
L. H. Michael, M. L. Entman, C. J. Hartley, K. A. Youker, J. Zhu, S. R. Hall, H. K. Hawkins, K. Berens, and C. M. Ballantyne H2147

VASCULAR PHYSIOLOGY

Mechanisms of hemolysate-induced $[Ca^{2+}]_i$ elevation in cerebral smooth muscle cells
H. Zhang, B. Weir, L. S. Marton, R. L. MacDonald, V. Bindokas, R. J. Miller, and J. R. Brorson H1874

Reciprocal regulation of endothelin-1 and endothelial constitutive NOS in proliferating endothelial cells
M. A. Flowers, Y. Wang, R. J. Stewart, B. Patel, and P. A. Marsden H1988

Contraction and endothelium-dependent relaxation in mesenteric microvessels from pregnant rats
I. F. Pascoal, M. D. Lindheimer, C. Nalbantian-Brandt, and J. G. Umans H1899

Electromechanical coupling and the conducted vasomotor response
J. Xia and B. R. Duling H2022

Cellular pathways of the conducted electrical response in arterioles of hamster cheek pouch in vitro
J. Xia, T. L. Little, and B. R. Duling H2031

Reactive oxidants mediate TNF-α-induced leukocyte adhesion to rat mesenteric venular endothelium
Y. Morita, M. G. Clemens, L. S. Miller, U. Rangan, S. Kondo, M. Miyasaka, T. Yoshikawa, and G. B. Bulkley H1833

Simultaneous ipsilateral and contralateral measurements of vasomotion in conduit arteries of human upper limbs
C. A. Porret, N. Stergiopulos, D. Hayoz, H. R. Brunner, and J. J. Meister H1852

Anandamide and Δ^9-THC dilation of cerebral arterioles is blocked by indomethacin
E. F. Ellis, S. F. Moore, and K. A. Willoughby H1859

Nonlinear resistances in hepatic microcirculation
R. Maass-Moreno and C. F. Rothe H1922

Regional differences in constitutive and induced ICAM-1 expression in vivo
J. Panés, M. A. Perry, D. C. Anderson, A. Manning, B. Leone, G. Cepinskas, C. L. Rosenbloom, M. Miyasaka, P. R. Kvietys, and D. N. Granger H1955

Microvascular distensibility in two different vascular beds in idiopathic dilated cardiomyopathy
H. Wroblewski, T. Nørgaard, S. Haunsø, and J. Kastrup H1973

A diffusion wake model for tracer ultrastructure-permeability studies in microvessels **(Modeling in Physiology)**
B. M. Fu, F. E. Curry, and S. Weinbaum H2124

The erythrocyte as a regulator of vascular tone **(Rapid Communication)**
M. L. Ellsworth, T. Forrester, C. G. Ellis, and H. H. Dietrich H2155

Effect of L-NAME on pressure-flow relationships in isolated rabbit lungs: role of red blood cells
R. S. Sprague, A. H. Stephenson, R. A. Dimmitt, N. A. Weintraub, C. A. Branch, L. McMurdo, and A. J. Lonigro H1941

Muscle blood flow during exercise in sedentary and trained hypothyroid rats
R. M. McAllister, M. D. Delp, K. A. Thayer, and M. H. Laughlin H1949

Endothelin-1 vasoactive responses in lambs with pulmonary hypertension and increased pulmonary blood flow
J. Wong, V. M. Reddy, K. Hendricks-Munoz, J. R. Liddicoat, R. Gerrets, and J. R. Fineman H1965

Modulation of coronary flow by left ventricular volume in the presence and absence of vasomotor tone
D. Manor, S. Williams, R. Ator, K. Bryant, and K. W. Scheel H2010

Evidence for uneven distribution of L-type calcium channels in rat pulmonary circulation
B. R. Walker H2051

Analysis of responses to kallidin, DABK, and DAK in feline hindlimb vascular bed
J. A. Santiago, E. A. Garrison, H. C. Champion, R. E. Smith, O. Del Rio, and P. J. Kadowitz H2057

Nitric oxide is an important determinant of coronary flow at rest and during hypoxemic stress in fetal lambs
M. D. Reller, M. A. Burson, J. L. Lohr, M. J. Morton, and K. L. Thornburg H2074

Select dietary fatty acids attenuate cardiopulmonary dysfunction during acute lung injury in pigs
M. J. Murray, M. Kumar, T. J. Gregory, P. L. Banks, H. D. Tazelaar, and S. J. DeMichele H2090

Assessment and modeling of the physical components of human corporovenous function **(Modeling in Physiology)**
J. G. Venegas, M. P. Sullivan, S. V. Yalla, and M. A. Vickers, Jr. H2109

INTEGRATIVE CARDIOVASCULAR PHYSIOLOGY

Transfer function analysis of vagal control of heart rate during synchronized vagal stimulation
A. Mokrane, A. R. LeBlanc, and R. Nadeau H1931

Hemorrhage alters plasma and cardiac enkephalins and catecholamines in anesthetized dogs
Z. Mateo, L. Napier, J. F. Gaugl, B. A. Barron, and J. L. Caffrey H2082

Effect of chronic endothelin blockade in hyperinsulinemic hypertensive rats
S. Verma, S. Bhanot, and J. H. McNeill H2017
